MARI LKHAGVADULAM BOLDBAYAR

Dublin, Ireland | +353 85 763 2964 | Lhaagiimaa@gmail.com

PROFESSIONAL PROFILE

MSc Cybersecurity student at the National College of Ireland with a completed Higher Diploma in Computing and practical academic experience in network security, penetration testing and digital forensics. Familiar with Kali Linux, Wireshark, Nmap, Autopsy and Android forensic workflows through controlled laboratory projects. Brings a foundation in programming, networking and analytical reporting, alongside professional experience in operations, marketing and accounting. Open to internship, graduate, trainee and junior cybersecurity roles, including security operations and digital forensics.

TECHNICAL SKILLS

Security & forensics: Kali Linux, Nmap, Wireshark, tcpdump, Autopsy, FTK Imager, ADB, JADX, NetworkMiner; network scanning, packet analysis, forensic evidence collection, log review and SHA-256 hash verification.

Networking & platforms: TCP/IP, HTTP/HTTPS, DNS, Linux, Windows, Android Emulator, VirtualBox, Git/GitHub.

Programming & development: Java, Python, JavaScript, HTML/CSS, SQL/MySQL, Spring Boot, Maven, gRPC, Protocol Buffers.

Cloud: AWS cloud fundamentals and cloud architecture concepts.

CYBERSECURITY & DIGITAL FORENSICS PROJECTS

Network Security and Penetration Testing | Hack The Box “Layover” (Academic Lab)

- Conducted host discovery, network scanning and service identification using Kali Linux and Nmap in an authorised lab.
- Captured and examined network traffic with tcpdump; reviewed HTTP communications, browser session cookies and internal connectivity.
- Recorded screenshots, technical observations and security recommendations for a group assessment.

Android Application Forensics | Telegram (Academic Investigation)

- Investigated Telegram on an Android emulator using ADB, Autopsy, FTK Imager and JADX.
- Collected application logs, documented controlled pre-/post-interaction observations and calculated SHA-256 hashes for evidence verification.
- Organised forensic artefacts, screenshots and findings for an investigation report.

Privacy & Data Governance | Ireland’s Smart Metering Infrastructure (Group Research)

- Evaluated privacy, fairness and cybersecurity risks of smart-meter data, including inference and re-identification concerns.
- Researched GDPR obligations, Irish energy-sector governance and links to UN Sustainable Development Goal 9.

EDUCATION

MSc in Cybersecurity | National College of Ireland, Dublin

Sep 2026 – Expected Aug 2027 | Current modules: Network Security & Penetration Testing; Security Fundamentals; Data Governance, Ethics & Sustainability; Forensics & eDiscovery.

Higher Diploma in Science in Computing (Level 8) | National College of Ireland

Completed May 2026 | Software Development, Databases, Algorithms, Distributed Systems, Computer Networks and Operating Systems.

ADDITIONAL TECHNICAL PROJECTS

Smart Home Automation System | Distributed Systems

- Built a distributed smart-home application using Java, gRPC, Protocol Buffers and Maven; explored service communications and IoT reliability considerations.

Student Management Web Application

- Developed a Java/Spring Boot web application with database integration, using H2/MySQL and Maven.

PROFESSIONAL EXPERIENCE

Assistant Manager | Giant Hotel, Seoul, South Korea

2020 – 2021

- Coordinated daily hotel operations, staff training and customer service in a busy environment.
- Analysed operating data, managed inventory and prepared routine reporting.

Product Marketing Specialist | Ulemj LLC, Ulaanbaatar, Mongolia

2018 – 2020

- Analysed product and market information; coordinated campaigns, vendors and cross-functional partners.
- Used data analysis to assess performance and identify improvements.

Accountant | Nomadic Expeditions, Ulaanbaatar, Mongolia

2012 – 2014

- Handled reconciliations, accounts payable/receivable, budgets and financial reporting with attention to accuracy and confidentiality.

OTHER EDUCATION

Professional Master’s in Digital Product Design (UX/UI) | TECH Global University | 2023–2024

Master of Arts in Social Welfare | Daehan Theological University, South Korea | 2015–2017

Bachelor’s Degree in Accounting | Mongolian University of Life Sciences, Mongolia | 2008–2012

CERTIFICATION & TRAINING

AWS Cloud Certification / fundamentals training — cloud computing, architecture, deployment and security concepts (certificate title and issuer to be verified).

LANGUAGES

Mongolian (native) | English (advanced) | Korean (advanced)
